

The Boston Scientific Foundation Continues to Support Breast Cancer Patients

The Boston Scientific Foundation awards grant for \$15,000, Allowing Non-Profit Organization to Continue to Provide a Free Program for Breast Cancer Patients.

North Andover, MA. — January 14, 2013 — [A Little Easier Recovery](#), a 501(c)(3) non-profit organization that strives to empower cancer patients to regain their dignity and control during their cancer treatment and recovery through a proven educational program. *A Little Easier Recovery* is thrilled to announce we have been awarded a grant for \$15,000 from The [Boston Scientific Foundation](#) to support safety net hospital patients. The Boston Scientific Foundation's mission is dedicated to transforming lives through innovative medical solutions that improve the health of patients around the world.

As a non-profit organization, we are able to provide a free program for patients who need it the most through grants like this, and donations to *A Little Easier Recovery*. [The Jacki Program](#) teaches patients how to manage surgical drains, regain independence, and live a better quality life throughout treatment and recovery. Additionally, the program offers an Organization System, which educates patients to self advocate for their care, and become a better communicator. This also helps the caregiver deal with a more organized patient and allows loved ones to all be on the same page.

The organization's success is shown in the overwhelming gratitude received from program participants; ninety-six percent of program participants have expressed they were grateful to participate and would recommend the program to others. The Jacki Program is donated directly to hospitals to distribute at the discretion of nurses and surgeons. Since its inception, over 9,000 Jacki recovery garments have been given to patients as an empowering gift. *A Little Easier Recovery* aims to help thousands more and help level the playing field in this unfair fight.

The Boston Scientific Foundation has awarded *A Little Easier Recovery* a grant in this amount for two consecutive years. According to Maureen Cardinal, Program Director, "We are grateful the Boston Scientific Foundation continues to support our initiative, and enable us to help make the traumatic ordeal of breast cancer "a little easier."
